	55 LINE – Die Cast Aluminum Traditional Exits	581		<b>Xtest</b>	
	30V LINE – Architectural Die Cast Aluminum Exits	582		The most advanced and affordable self-diagnostic/self-test circuit available. It exceeds all UL924 and NFPA101 requirements for self-diagnostic/self-testing equipment. Provided as a standard feature on the largest selection of emergency equipment in the industry, this innovative circuit continuously monitors system parameters to insure reliability and operation of your life safety equipment.	
	30 LINE – Fully Recessed Die Cast Aluminum Exits	583		<b>Compac</b>	
	60 LINE MAX – All Purpose Exits	584		The COMPAC™ Series of thermoplastic emergency products are contemporary and performance driven. With one of the largest product offerings of its kind, the COMPAC™ Series delivers innovative designs and unmatched flexibility. All Compac products feature the X-test circuit as standard, thus providing peace of mind that the products are exceeding monthly code required testing requirements.	
	<b>Xtest</b> Self-Diagnostic/Self-Test Circuitry	585		<b>Value+</b>	
	CXX Series <b>COMPAC</b> Thermoplastic Exits <b>Xtest</b>	586		The Value+ Series provides an attractive and economical solution for the design and build emergency lighting market. These products are easy to install and versatile enough to meet the demands of today's budget conscious customers.
